SCREEN PANELS AND SIEVES FOR VIBRATING SCREEN

Vibrating Screens for Coal & Mineral Industries

Introduction

OURUN WIRE MESH supply a variety of screen panels to suit a wide range of working conditions (static and vibrating) for sizing, grading and dewatering processes in the coal and mineral industries. A full range of crimped screen, perforated metal screen and wedge wire screen products with special edge preparations for rectangular machines, and circular separators, and all related accessories.

How is works?

Vibration screen by the vibrator with eccentric nature makes vibration sieve. The material on the sieve under vibration action to achieve good loose and layered; The vibration screen counterweight mass size can be adjusted, adjustable vibration screen amplitude according to production requirements; Vibrating screens separate material to individual particle sizes or remove solids from liquids.

Applications

- Crushed Stone Quarries
- Clay, Asbestos & Gypsum
- Sand & Gravel Plants
- Coal Preparation Plants
- Slag Plants
- Phosphate Rock
- Iron Ore Mines
- Copper Mines

Advantages

- Various shapes and types
- Stainless steel construction
- Robust, torsion-resistant construction
- Easy to install and easier to maintain
- Easily changed to suit varying conditions
- Adaptable to most vibrating screen decks
- Long service life

Technical Parameters

When ordering, please specify:

The followings are necessary important information for a complete specification of the screen panels:

1. Type

- Crimped wire screen
- Wedge wire screen panels
- Sieve bend screens
- Perforated sheets

2. Material

- Plain steel: Q195, Q215, Q235
- Stainless Steel: 304, 304L, 316, 316L

3. Openings

From 0.5 mm to 100 mm

4. Panel size

300 x 600 mm to 1220 x 2440 mm
